TESTIMONIALS

“Throughout this summer, I have been able to work on actual program work. I have worked with the team to develop a test program. I have enjoyed learning from the team members and feeling like I am making a meaningful contribution.” – Holly

“My summer internship at Nightwing was a transformative experience. I worked on high visibility data visualization, analysis, and AI powered projects, while collaborating with talented developers and senior leadership. I expanded my knowledge of data-driven decision making under the data mesh architecture Nightwing moves towards, while expanding my data engineering skills. If you’re passionate about cybersecurity and data, this company is the place to be.” – Camden

“My intern experience so far has been fantastic. I’ve met awesome people and learned so many new things; it has been a blast!” – Gabriel

You must be enrolled and pursuing a Bachelor's or advanced degree in an applicable discipline unless otherwise noted in job description.
